

BISWADEEP CHAKRABORTY

biswadeep@gatech.edu || +1(404)932-2269 || Google Scholar || LinkedIn

EDUCATION

Georgia Institute of Technology

Ph.D. in Electrical and Computer Engineering
Minor in Mathematics
Masters in Electrical and Computer Engineering

January 2020 - Present
Advisor: Prof. Saibal Mukhopadhyay

Jadavpur University

B. Tech. in Electronics and Telecommunication Engineering
First Class with Honors & Distinction

July 2015 - June 2019
Advisor: Prof. Amit Konar

EXPERIENCE

Georgia Institute of Technology

GREEN Lab

Atlanta, USA
January 2020- Present

Graduate Research Assistant under the supervision of Prof. Saibal Mukhopadhyay.

- My current research endeavors are centered around non-convex optimization, zeroth order optimization, stochastic optimal control, meta-learning, online convex optimization, and online learning. This work focuses on developing advanced computational methods and algorithms for efficient problem-solving in complex, dynamic environments. Specifically, I am investigating the application of these techniques in the context of machine learning and neuromorphic computing, aiming to enhance the capabilities and efficiency of neural network models. My efforts include exploring innovative strategies in online learning and optimization and applying meta-learning principles to adapt and evolve models in real time. The ultimate goal of this research is to push the frontiers of brain-inspired learning methods enabling more sophisticated and energy-efficient data processing and decision-making systems.

PanAgora Asset Management

Stock Selector & Equity Strategies Team

Boston, USA
May 2023-August 2023

- Worked as *Quantitative Research Intern - Equities* with Mr. Lei Liu and Mr. Richard Tan at the Stock Selector and Equity Strategies team, building event-driven volatility trading strategies using large language models.

National University of Singapore

NUS-Singtel Cyber-Security Research and Development Laboratory

Singapore
July 2019-December 2019

- Worked as *Research Assistant* at the Singtel-NUS Lab with Prof. Mohan Gurusamy, Dr. Dinil Divakaran, Dr. Ido Nevat, and Prof. Gareth Peters on developing and implementing a risk-aware feature selection algorithm for IoT Device Classification.

University of Sherbrooke

INTERLAB Research Laboratory

Quebec, Canada
May 2018-August 2018

- Worked on research projects involving developing algorithms and a simulator using VPython to perform stochastic simulations of the nano-wire formation in a nano-communication network.

Jadavpur University

Artificial Intelligence Lab

West Bengal, India
December 2017 - June 2019

- Worked under Prof. Amit Konar on several research projects based on deep learning and signal processing-based modeling and characterization of EEG and fMRI signals and their applications in novel brain-computer interface algorithms.

Indian Academy of Sciences

National Physical Laboratory

New Delhi, India

May 2017– July 2017

- Worked under Dr. Amitava Sen Gupta, ex-Director, National Physical Laboratory, India, on modeling an algorithm for shooter localization from gunshot acoustics using wireless sensor networks.

Jadavpur University

Advanced Embedded and Digital Systems Laboratory

West Bengal, India

May 2016 – December 2017

- Worked as an undergraduate research assistant under Dr. Amitava Mukherjee, IBM India, and Prof. Mrinal Kanti Naskar on future 5G Communication Networks, Information Centric Networks, and Network Security.

ACADEMIC ACHIEVEMENTS

ECE STEER Fellowship 2023

J.P.Morgan Fellowship University Finalist 2022

Qualcomm Innovation Fellowship Finalist 2022

MITACS Globalink Fellow

Indian Academy of Sciences Summer Research Fellow

Best Undergraduate Thesis, Department of Electronics and Telecommunication Engineering, Jadavpur University 2019

First Class with Honors & Distinction in Bachelor of Engineering from Jadavpur University in 2019

TALKS

2023 SNUFA: Invited Talk and Poster

Title: Dynamics in Diversity: Harnessing Heterogeneity in Neuronal and Synaptic Dynamics in SNNs *Link*

2023 ICERM Workshop on Mathematical and Scientific Machine Learning

Title: Learning to Predict Using Network of Spiking Neurons *Link*

2019 IEEE International Conference on Systems, Man and Cybernetics (SMC)

Title: Phase-Sensitive Common Spatial Pattern for EEG Classification.

GRANTS

Contributed to the development of key grant proposals in the fields of neuromorphic computing and spiking neural networks, for my advisor and collaborators. Notable proposals where I played a substantial role include:

A Reconfigurable Ferroelectronics Platform for Collective Computing (FALCON)

NSF FuSe

PIs: Nikhil Shukla, Zongli Lin, Saibal Mukhopadhyay, Suman Datta, Lauren Garten

Hybrid Learning for Mission-Focused Artificial Intelligence: Application to StarCraft Research

Office of Naval

PI: Saibal Mukhopadhyay

Hybrid Learning: Algorithm and Architecture for Coupling Model and Data to Learn Dynamics of Complex Systems

Army Research Office

PI: Saibal Mukhopadhyay

Enhancing Neuromorphic Design: Ferroelectric Materials in Adaptive Neural Networks

NSF CISE (under review)
PIs: Sourav Datta, Saibal Mukhopadhyay

RELEVANT PROJECTS

Hybrid Learning for Mission-Focused Artificial Intelligence

- Studied the impact of stochasticity on DNNs for modeling complex systems like forest fire, identifying and resolving failures in the training and evaluation pipeline
- Worked on sequence-to-sequence modeling using advanced Deep Learning architectures, including Convolutional, Recurrent, and Transformer-based networks, specifically for modeling spatio-temporal systems.

Robust and Trustworthy Hardware-based Malware Detector (HMD)

- Developed a real-time HMD employing a novel statistical classifier using multiple instance learning, resulting in a 6-7% decrease in false positive rates compared to existing methodologies
- Designed XMD, the next generation HMD, which boosts detection performance by 30-40% for malware lacking architectural side-channel effects
- Conducted a trustworthiness analysis of current HMDs using an ensemble-based uncertainty estimator, identifying failure points in handling out-of-distribution samples

GRADUATE COURSEWORK

Machine Learning and Optimization: Probabilistic Graphical Models in Machine Learning, Statistical Machine Learning, Mathematical Foundations of Machine Learning, Systems for Machine Learning, Stochastic Systems, Topics on Continuous Optimization, Statistical Inference on Random Graphs, Calculus of Variation

Neuroscience: Information Processing Models in Neural Systems, Neurophysics, Neuronal Dynamics and Networks

Probability and Statistics: Fourier Tech and Signal Analysis, Statistical Estimation

PROFESSIONAL ACTIVITIES

Reviewing Responsibilities

- **Journals:** IEEE Transactions on Neural Networks and Learning Systems, Neurocomputing, IEEE Transactions on Image Processing, Neural Networks
- **Conferences:** IEEE SMC, CVPR, AAAI, IEEE PReMI, NeurIPS, ECCV, ICLR, AISTATS, ICML

Mentorship Mentored six new Ph.D. students as a part of the Georgia Tech ECE Graduate Student Organization (GSO) mentorship program.

Student Government Association: Was elected as a senator for the Georgia Tech Student Government Association to represent the graduate students of the School of Electrical and Computer Engineering
